Penn State MPH Program
Statement of Values

The Penn State MPH Program will embody and instill in its students the following values:

Science
- Building the evidence base to improve health of communities and populations
- Translating science to practice and policy

Collaboration
- Partnering with public health stakeholders
- Taking a multidisciplinary, team-based approach

Social Responsibility
- Promoting respect, fairness, and equity
- Reducing health disparities

Professionalism
- Fostering strong leadership
- Promoting ethical practice

Health & Wellness
- Taking a holistic view of health and wellness
- Prioritizing prevention to improve the public’s health

Diversity
- Promoting diversity across the educational, research, and service environments
- Building a culturally sensitive and competent workforce
